

DID YOU KNOW?

...That in Pennsylvania, all operations that generate or land apply manure, regardless of scale, are required by law to have, maintain, and implement a Chapter 91 Manure Management Plan?

AND, within the next 5-7 years District Staff and DEP staff will be visiting ALL farms within the Chesapeake Bay Watershed of Chester County to provide proof of these plans if they apply?

It's TRUE!

So...In an effort to help operators and landowners make responsible decisions regarding the generation, handling, and application of manure, in addition to being compliant with the law, the Chester County Conservation District (CCCD) is once again hosting several **Manure Management Plan Workshops!**

During these workshops, District staff will discuss Manure and Nutrient Management regulations in Pennsylvania, and work to assist attendees with the development of Manure Management Plans for their operations.

2018 Manure Management Workshops

February 14, 2018
Lower Oxford Township Building
9:00 am - 3:00 pm

March 28, 2018
Honey Brook Township Building
9:00 am - 3:00 pm

March 14, 2018
West Fallowfield Township Building
9:00 am - 3:00 pm

April 18, 2018
Lower Oxford Township Building
9:00 am - 3:00 pm

Lunch and Refreshments will be provided for all-day attendees.

RSVP: If you are interested in attending one of the Manure Management Workshops, please contact the Chester County Conservation District (CCCD) at 610-925-4920, extension 100, or e-mail Laurell Bostdorf at lbostdorf@chesco.org to register today!

If you are unable to attend a workshop, the CCCD will also assist landowners in one-on-one meetings in the development of Chapter 91 Manure Management Plans.

Just call us!
